How to open and close the lock

1. dial in code

2. pull body back

3. open lock

To open

- 1 Set the wheels to 000000 (first time) or your own code if you have already set a chosen code.
- 2 Pull the silver plate on the lock body down
You will now be able to open the lock.
- 3 To close the lock simply push the silver plate back in and shuffle the wheels
