

Stronghold® BULLIT™ WS50S Wide Shackle Clearance

These hi-security padlocks are purpose designed for securing roller shutters, warehouses, garages, lorries, perimeter gates, trailers and high security doors. For maximum strength and durability, the lock body is made from solid hardened steel and the shackle is made of hardened boron alloy steel. Designed to meet the CEN European Standards.

- 2 1/8" Solid hardened steel lock body.
- 3/8" Hardened boron alloy steel shackle.
- Unique lock body design for protected shackle clearance.
- Supplied as standard, K series cylinder with 250,000 key differs with 2 nickel silver keys.
- Anti-bump, anti pick, highly attack resistant.
- Available keyed alike and master keyed.
- Optional cylinder upgrades, Restricted and Dimple profile available.
- Two levels of coating with zinc plating as a base coat and black electrophoretic as the second coating, giving double resistance to corrosion and surface damage.
- Dual compound lock body cover for easy handling.

Recommended for

Roller shutters, warehouses, garages, lorries, perimeter gates, trailers and high security doors.
